PD Arrays Tell You Everything

Why?

- The Trend
  - Bullish
  - Bearish
  - Consolidating
- Daily Bias
- Context (where to take a trade)
- Entry
- Risk Management

Why PD Arrays?

Note to self: NQ replay
backtest on 4h, 12 Feb 18:00

Because price is always moving towards a PD Array,
it’s our job to find out which one is next.

Move towards a Premium Array

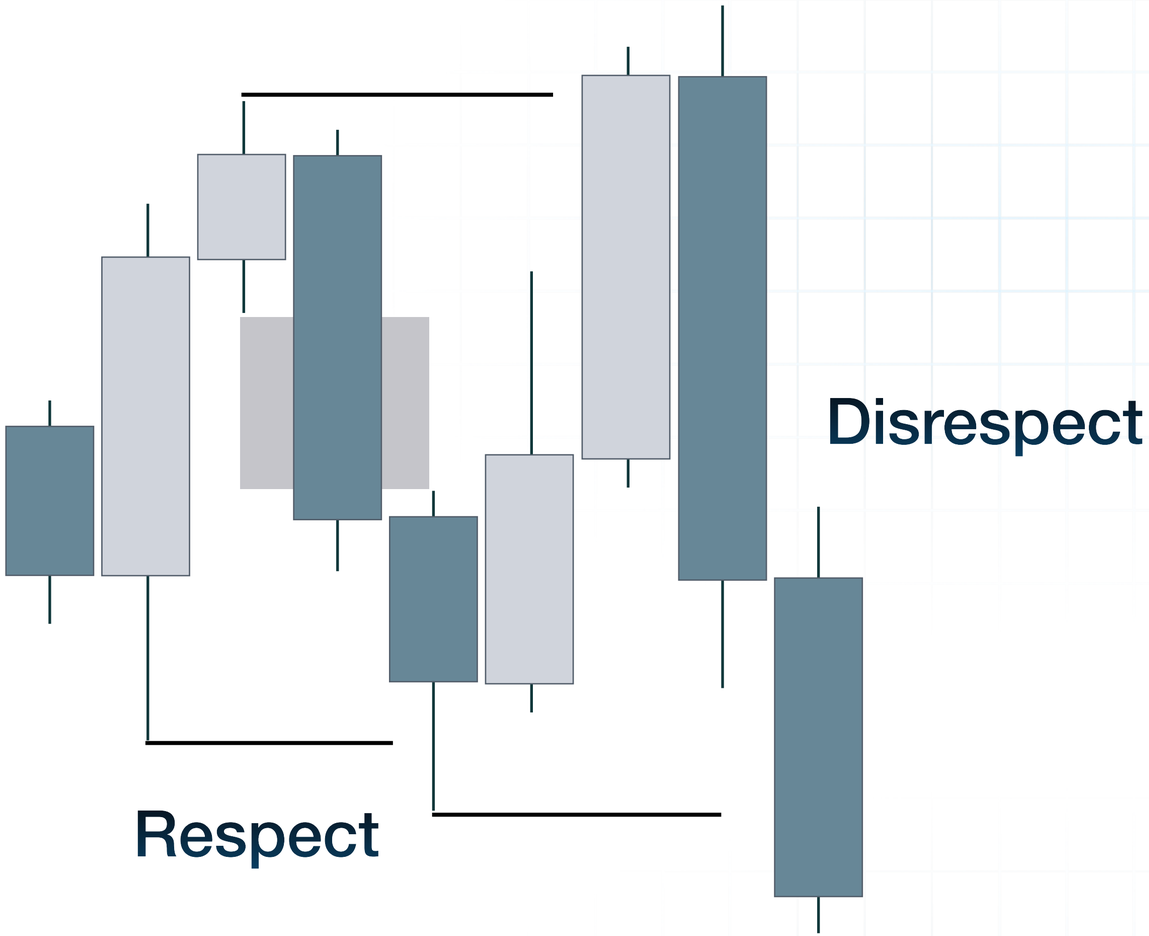
What can PD Arrays do?

Note to self: NQ replay backtest on 4h, 12 Feb 18:00

Show it in the chart



A disrespected PD Array tells you just as much as a respected one, but most traders are obsessed with needing it to be respected.

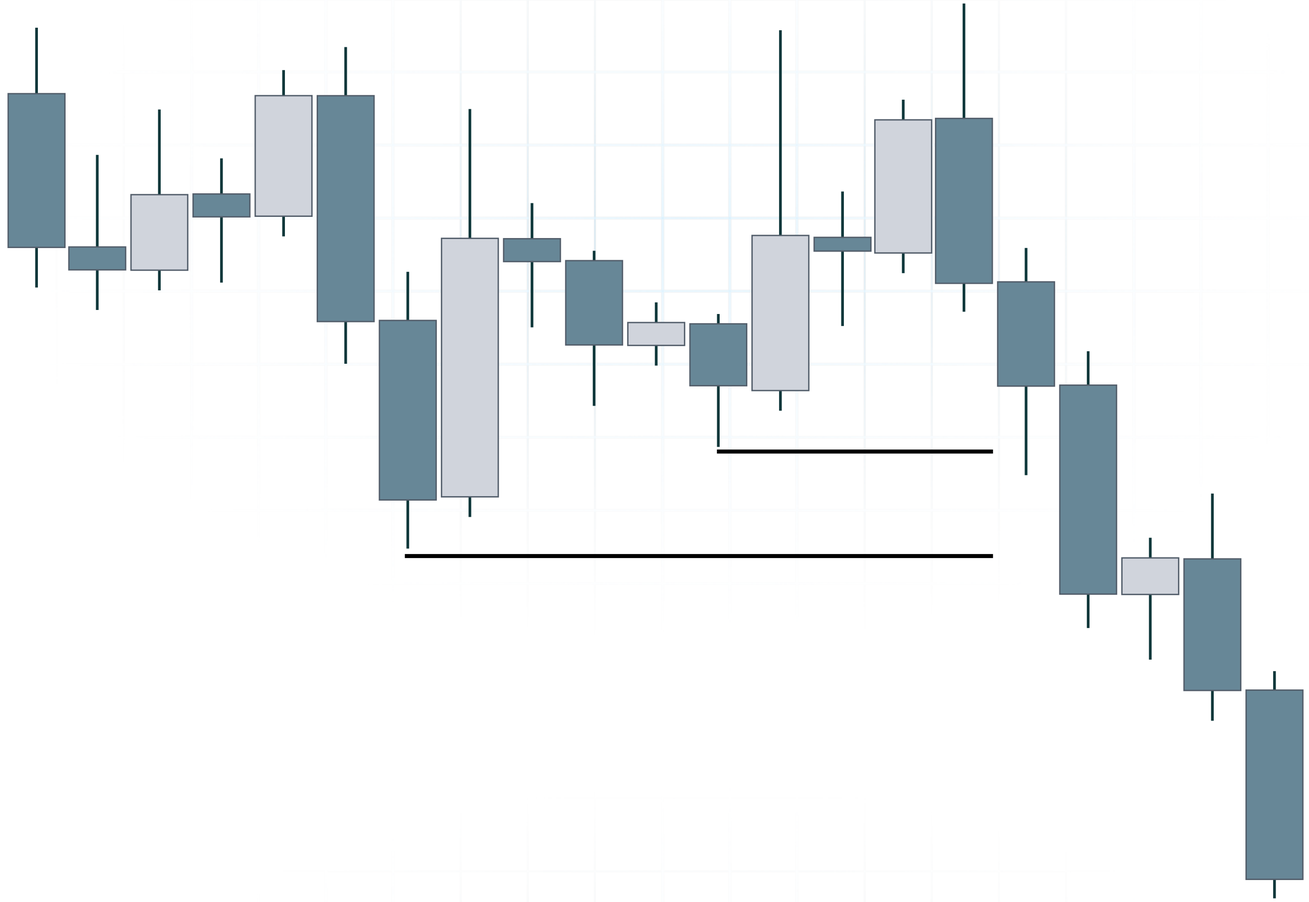
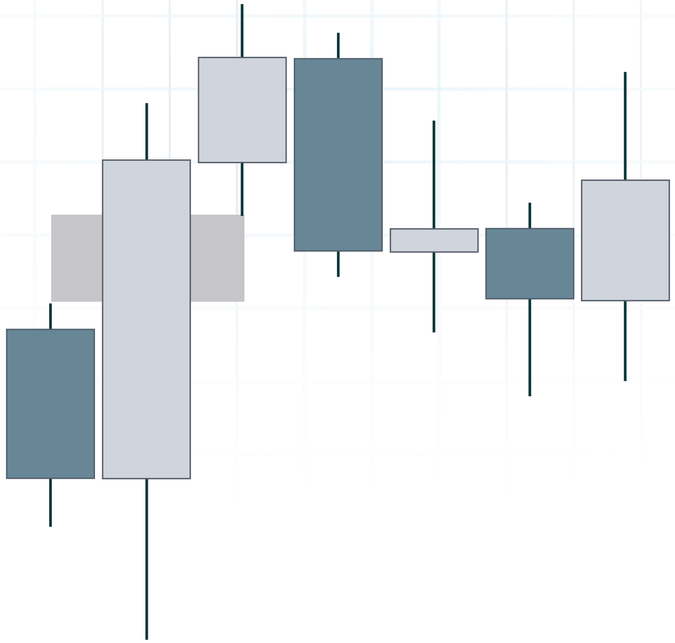
Getting out of a Consolidation

Disrespect a Side



Not good



It’s taking too long to reject or continue lower; the strength is broken.

3. Daily Bias

Move towards a Premium Array

Timeframes

Mark out the PD Arrays

1. Mark it out on the Monthly
2. Mark it out on the Weekly
3. Mark it out on the Daily
4. Mark it out on the 4h

→

Which ones are we Respecting?

Which ones are we Disrespecting?

↓

Form the story, write it down if it helps. “We first did this, then this, now I’m expecting this based on that”

←

Mark out the next likely possibilities based on Respect vs Disrespect.

4. Context

The Context Area is our “safe zone”.
The area where we can take our entry.

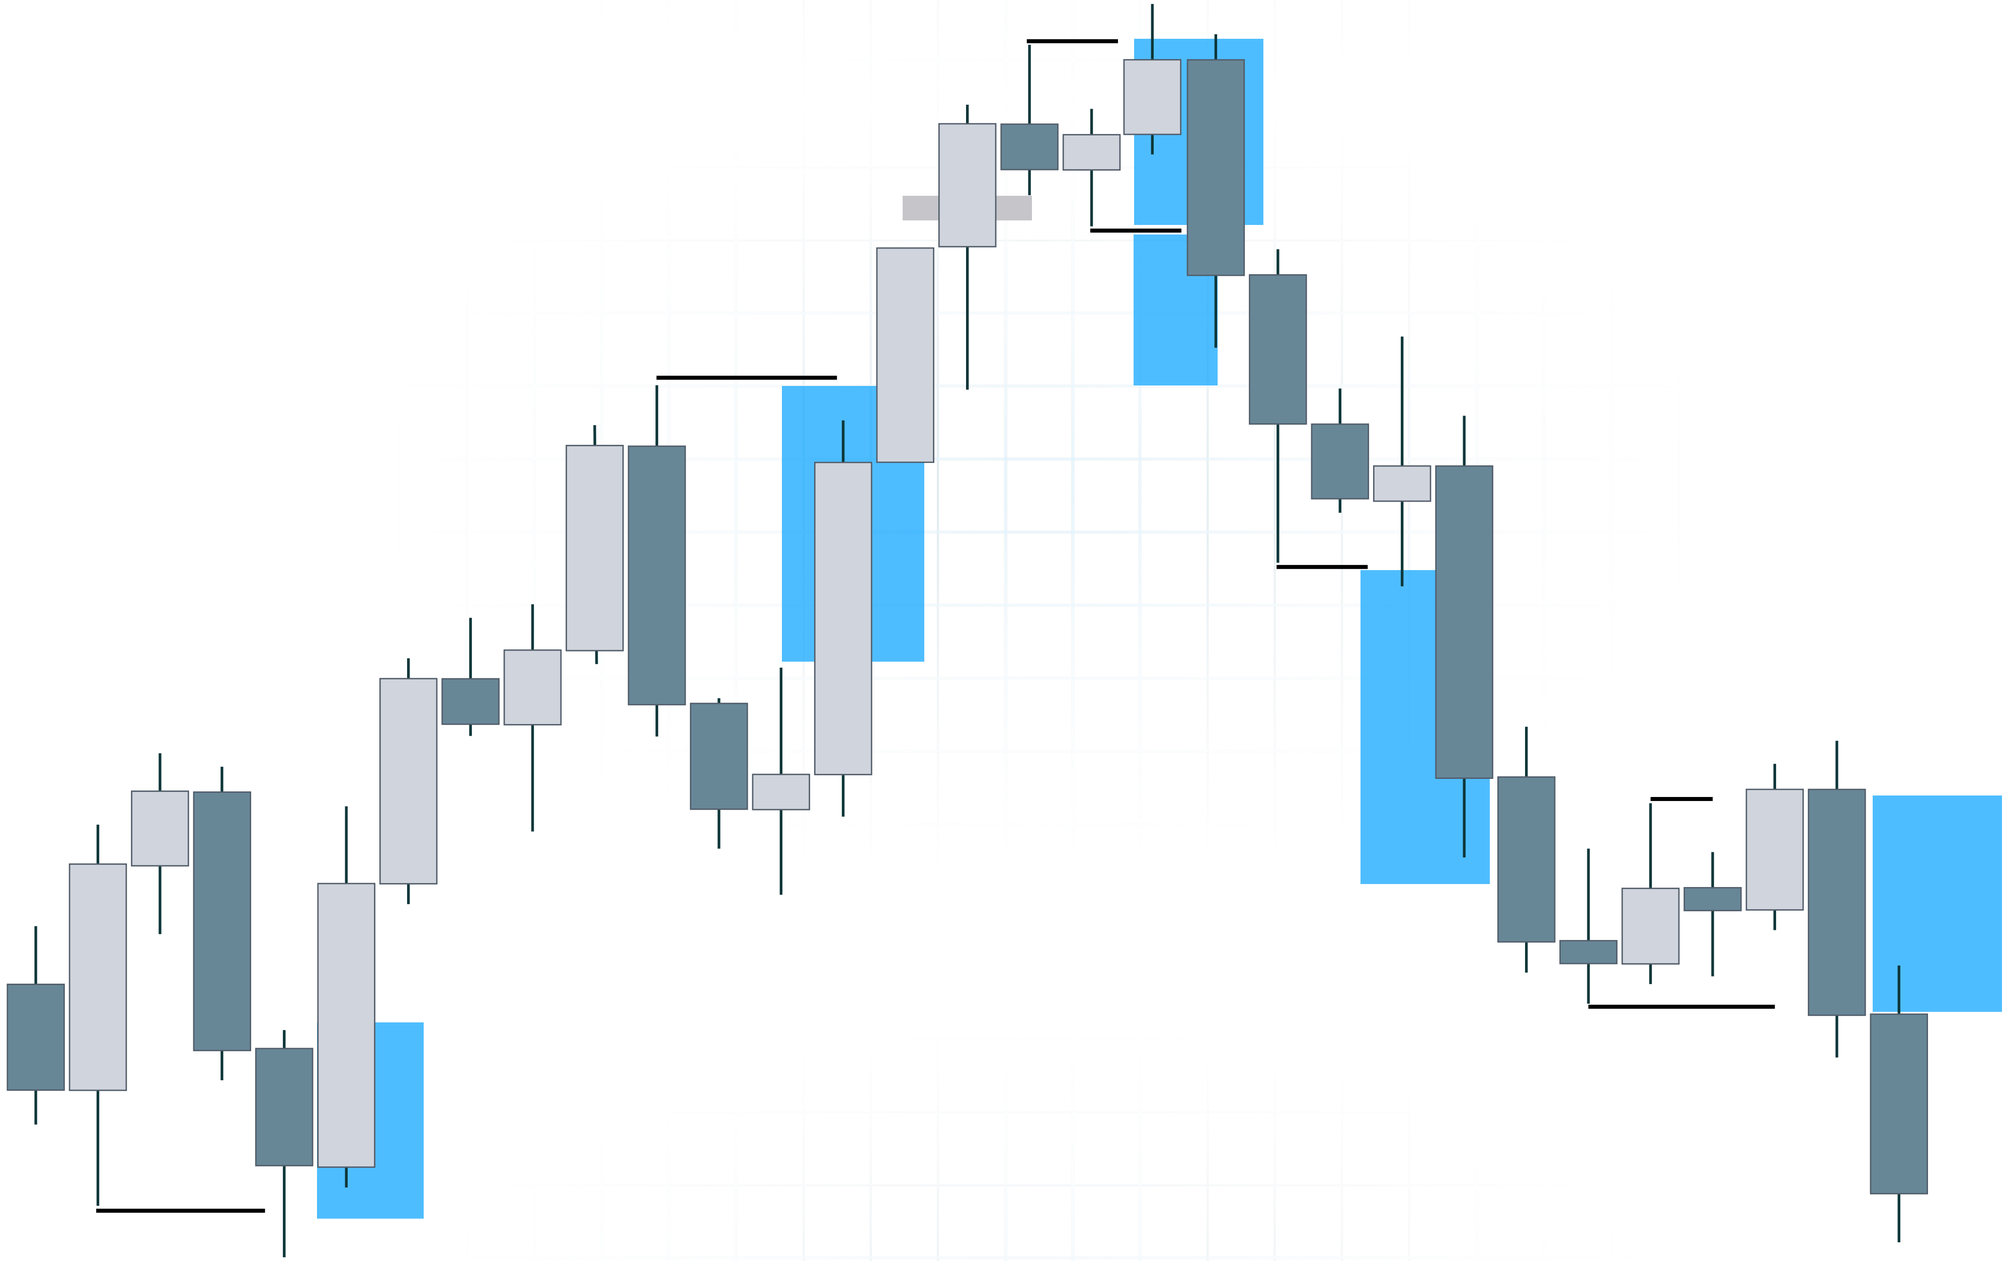
Context Areas



You use the LTF within the HTF context area to profit from the move.

5. Entry

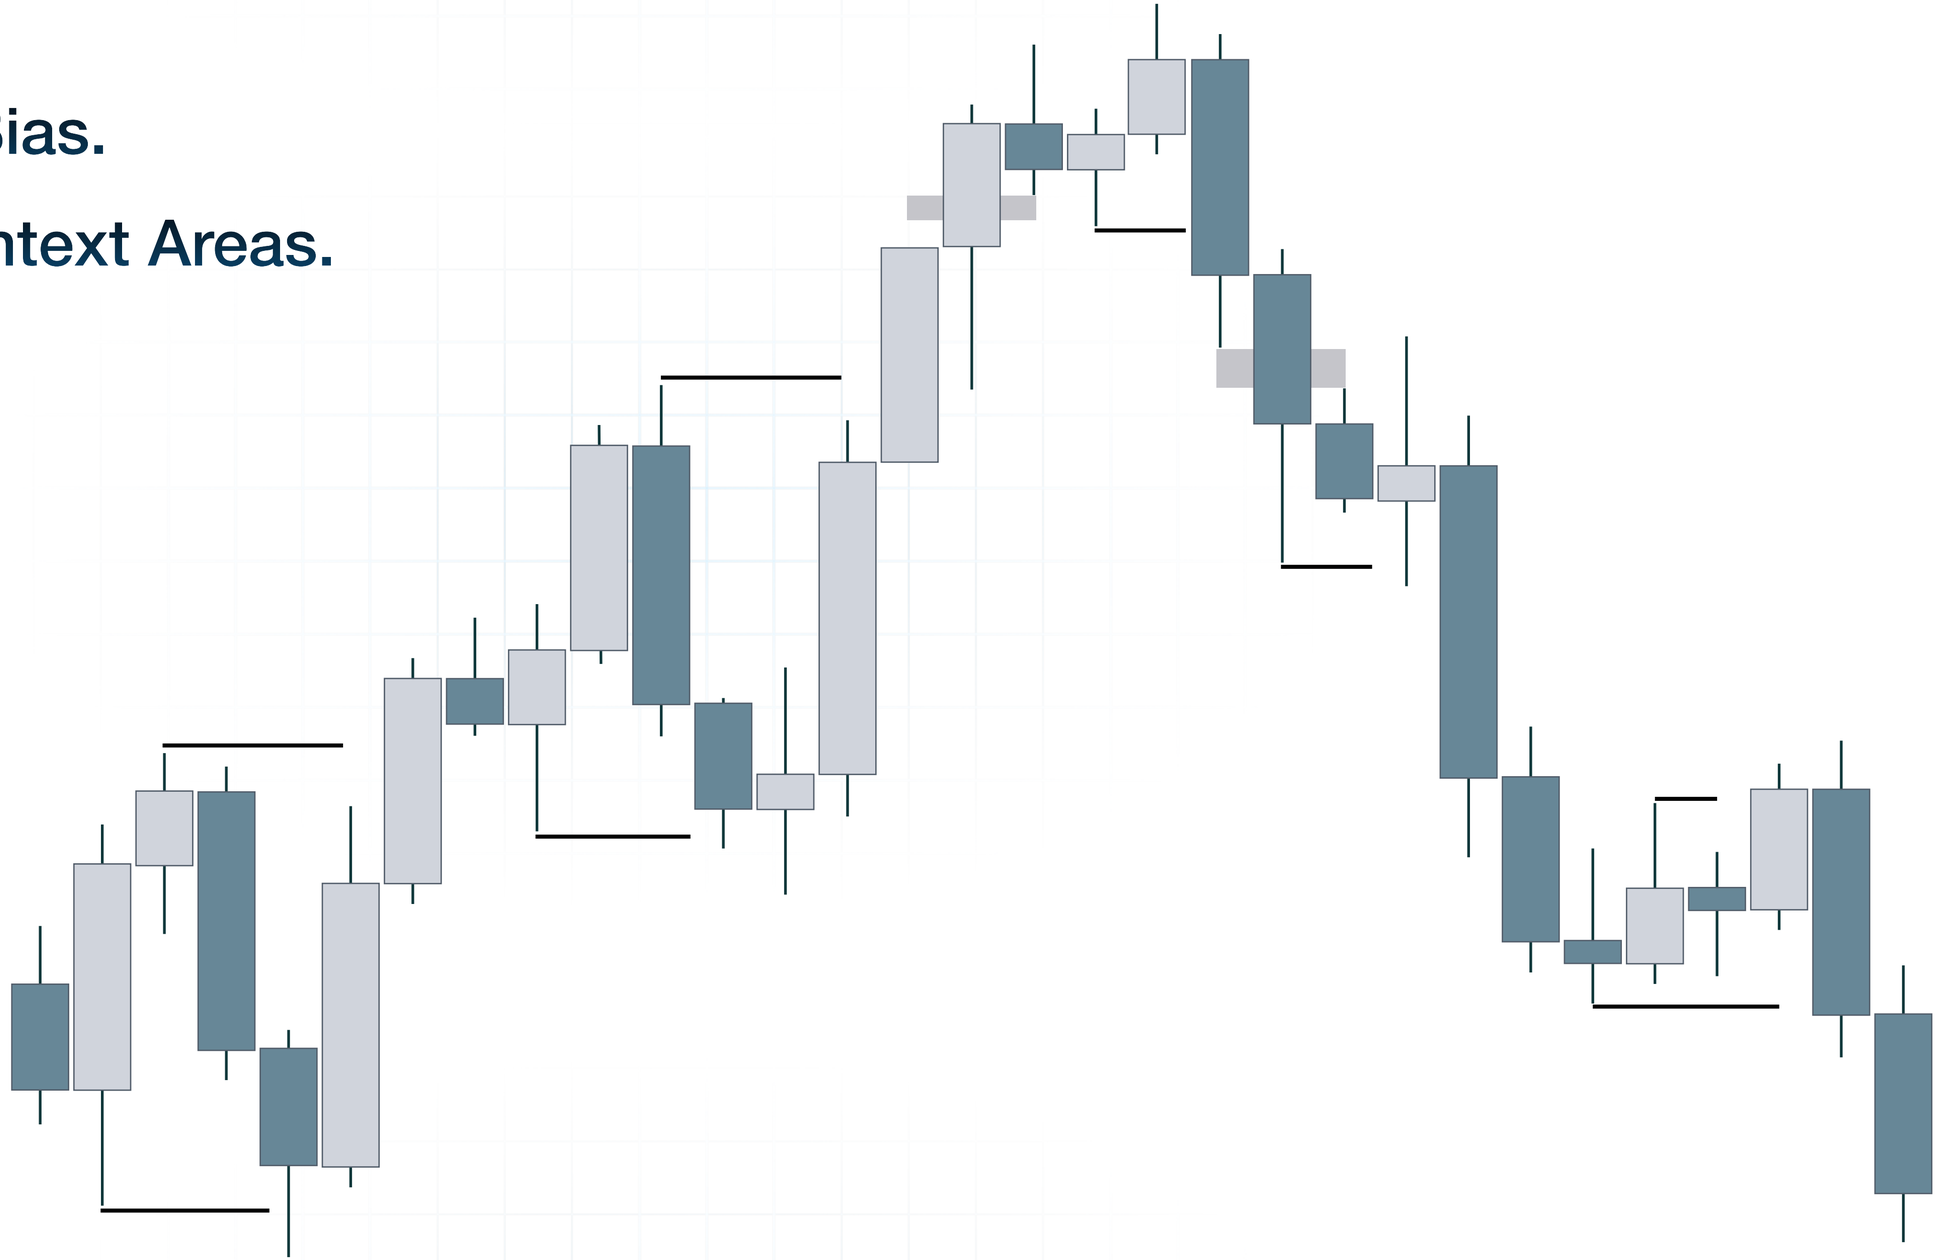
Remember the Reversal?

This is our Daily Bias.

These are our Context Areas.

This is our Entry.

It’s all Fractal.



The Entry is ideally 2 timeframes below the Context Area.

The Order

Daily Bias

Creates the “main” target.

→

Context

Creates our area
to look for an Entry.

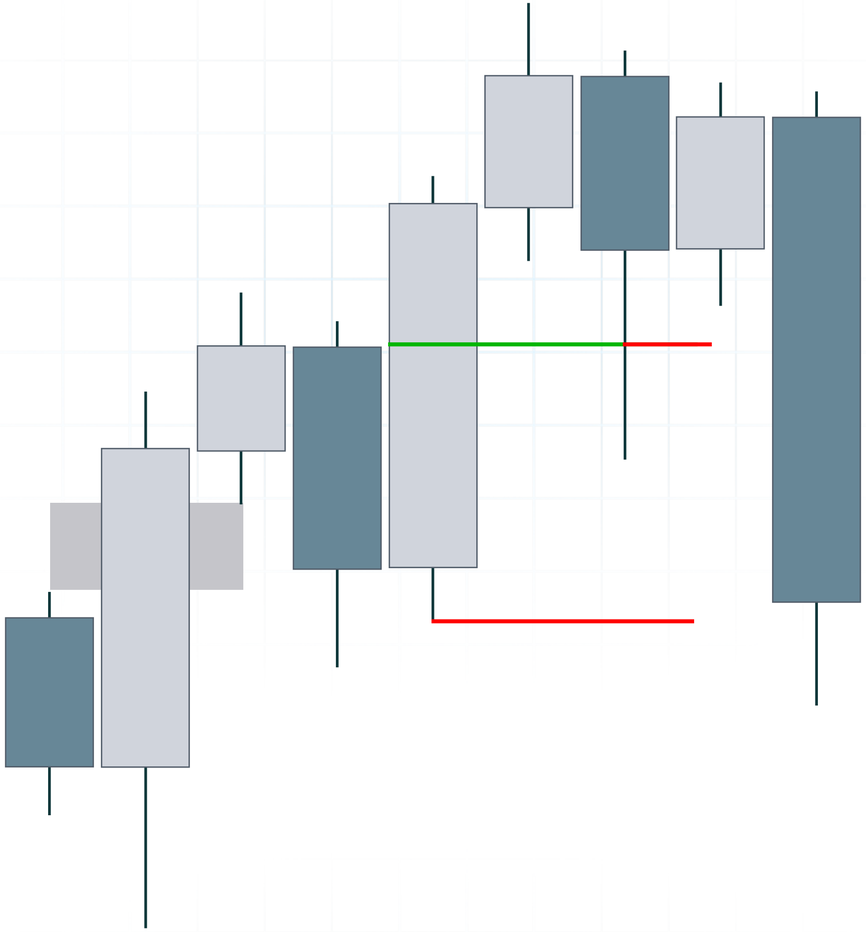
↓

Enter 2 timeframes
below.

←

Risk Management.

6. Risk Management

Go breakeven when there’s no reason to return.


Often, after a retracement back into your entry area.
